### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: The title is being changed to "A position sensor with an optical member of varying thickness"

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

With respect to claims 1, 2, 15, 16 and 20, prior art fails to teach or reasonably suggest a position sensor comprising a semi-transparent optical member having a shape that includes a varying thickness and an output voltage transmitted by a light receiving device varies based on the thickness of the optical member, in addition to the other limitations of the claims.

Claims not specifically addressed are allowable due to their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
